

The 5C's System

Dental Photography for Clinical Excellence
and Practice Growth

**You don't need
better dentistry.
You need better
communication.**

**Patients don't say no to treatment...
They say no to what they don't
understand.**

If you've ever felt like:

- Patients hesitate on ideal treatment
- Cases get compared only on price
- Your work isn't fully understood

**It's not your dentistry.
It's how it's communicated.**
